

NVCOG Environmental Services Request for Qualifications

Questions and Answers

Through June 14, 2019

1. Does the cover count toward the page limit?

A cover page will not be counted toward the page limit.

2. Should information regarding drillers and labs be included?

It is a good idea to include information on drillers and labs, particularly if they are certified DBEs.

3. Do Women-owned Business Enterprises (WBEs) count toward the participation goal?

Women-owned businesses are eligible for Disadvantaged Business Enterprise Certification in the State of Connecticut. Only those firms that have been certified with the State of Connecticut can be counted toward our State and Federal DBE goals. If a firm is not yet certified, their status is worth describing for documentation of efforts to retain a DBE firm. Separate from review of the RFQ, this also helps NVCOG identify potential firms that could benefit from DBE certification assistance.
