Request for Applications (RFA) for Brownfield Cleanup Projects

NVCOG is announcing available funds for Remediation and Abatement projects, open to all Regional Brownfield Partnership members.

**What can these funds be used for?**

RLF funds are used to strengthen the marketplace and encourage stakeholders to leverage resources to clean up brownfields. Funding is available strictly for cleanup planning and remedial activities caused by hazardous or petroleum contaminates. Examples of contaminants include leaking underground storage tanks, oil lubricants, Polycyclic Aromatic Hydrocarbons (PAHs), Volatile Organic Compounds (VOCs), Polychlorinated Biphenyls (PCBs), heavy metals, and more.

Staff will review specific requests to determine eligibility.

**Eligibility:** Sites within the Regional Brownfield Partnership service area are eligible.

Subgrants (maximum request $350,000) are available to eligible entities including municipalities, redevelopment authorities, and non-profit organizations to facilitate cleanup of contaminated properties. Private entities are ineligible to apply.

Low-interest Loans (no maximum request) are available to municipalities, developers, or non-profits for cleanup activities.

**Funding**

Subgrants have a maximum request $350,000 and no minimum.

Low-interest Loans have no maximum or minimum request. When loans are repaid, the loan amount is returned including the interest accrued into the fund and re-lent to other borrowers, providing an ongoing source of capital within the region. Our Bridge Loan Rate is 0-3% for up to 24 months.

**Timeline**

The NVCOG will be accepting subgrants and loan applications until **Friday, August 19th, 2022.**

**Application**

To apply, access the [application available here](#), click RLF Pre-Application, and submit to rrodriguez@nvcogct.gov.
