What is Affordable Housing?
History of Affordable Housing in Connecticut
Planning and Zoning Strategies to Promote Diverse Housing Options
Questions and Answers
We are dedicated to ensuring everyone in Connecticut has a safe, stable home that is affordable to them in an equitable community of their choice.

Celebrating our 25th Year of Affordable Housing Advocacy
What is Affordable Housing?

• Housing that received financing from a government program and is restricted to residents with low or moderate income.
• Properties with deed restrictions limiting the rental or sale to income-qualifying families.

• Less-expensive market-rate rental housing, sometimes called naturally occurring affordable housing (NOAH).
• Rents are relatively low compared to the regional housing market.
• Housing quality can be poor.
• Tenants are unprotected from rent increases.
• More affluent towns typically don’t have a large supply of NOAH.
NOAH Benefits and Risks?

Unrestricted lower cost housing, when available, is a critical supply, but it is at risk in the Naugatuck Valley as the region continues to revitalize, but also as these older homes continue to age.

Do you have NOAH in your community?
What rent or mortgage payment is affordable to the “median household” in your town? 80% of median? 50% of median?

A family of three earning the state median income can “afford” a monthly housing cost of $2,600.

At 80% the affordable cost drops to $2,141, 50% = $1,338, and at 30% of the state median they can afford a monthly housing cost of $803.

How many “unrestricted” homes are in your community that these families could afford?
What was Affordable Housing?
What is Affordable Housing Now?
Who Needs Affordable Housing?

CT's Housing Wage

The Struggle to Afford Housing

Changes in the economy, household formation, inflation, and wage stagnation – leave many in Connecticut struggling to afford housing. Many jobs pay less than the state’s median household income of $79,855 annually and have an hourly wage that is less than the housing wage (what one needs to afford a typical 2-BR apartment of $27.37).

- Waitress: $12.58
- Cashier: $12.90
- Childcare Worker: $13.45
- Healthcare Aide: $14.11
- Veterinary Assistant: $15.47
- Hairdresser: $16.06
- One Bedroom Housing Wage: $22.16
- Two Bedroom Housing Wage: $27.37
- HVAC Technician: $30.91
- Radiographer: $34.43
Who Needs Affordable Housing?

- Elderly households on fixed incomes
- Individuals with disabilities with very limited/fixed incomes
- Minimum wage and low-wage worker households - often service industry employees and their families
Affordable Housing at Risk

CONNECTICUT

HUD and USDA programs play an important role in providing affordable homes to extremely low-income (EL) families across the state. Many of the publicly supported homes, however, face expiring rent restrictions and are at risk of becoming unaffordable to the state’s lowest income families.

- 35% publicly supported rental homes across the state receive Section 8 contracts.
- 6% publicly supported rental homes with expiring affordability restrictions in the next five years and 3,549 public housing units are in need of immediate investment.
- 7% publicly supported rental homes face expiring affordability restrictions in the next five years and 3,549 public housing units are in need of immediate investment.*

*Indicated by a RAC score less than 4.

Data from the National Housing Preservation Database

- 85,403 Shortage of rental homes affordable and available for EU renters
- 66% Percent of EU households spending more than half of their income on rent
- 72,989 Number of publicly supported rental homes
- 5,250 Number of publicly supported rental homes with affordability restrictions expiring in next five years

The Zoning Enabling Act (§ 8-2) and Housing Diversity

Zoning regulations must:

• “encourage the development of housing opportunities, including opportunities for multifamily dwellings, ... for all residents of the municipality and the planning region in which the municipality is located.”

• “promote housing choice and economic diversity in housing, including housing for both low- and moderate-income households.”

Zoning regulations cannot:

• Establish a minimum floor area for dwellings greater than that contained in building, housing or other codes.

• Place a numerical or percentage cap on the number of mixed use or multi-family dwellings in a town.
Local land use decisions may not be made based upon:

• Consideration of the financial viability of a proposal.
• Consideration of a proposal’s projected number of school children, effect on the town’s education budget, or impacts on property taxes.
• A proposal’s perceived inconsistency with the “character of the town” and must reference demonstrable physical characteristics of the proposal in a denial.
The Affordable Housing Appeals Act ($8-30g)

- $8-30g allows housing developers willing to build housing with long-term affordability to low- and moderate-income households to challenge a town's failure to approve the proposal.

- At least 30% of homes in these developments must be priced so that lower income earners will spend less than 30% of their income on housing costs.

- A town can achieve a four-year exemption from 8-30g if it builds a sufficient number of affordable homes.

- Twenty-nine municipalities are exempt from 8-30g (>10% affordable housing).
The Affordable Housing Appeals Act (§ 8-30g)
What Housing Counts for 8-30g

- Low- and moderate-income housing with governmental financial assistance
- Housing with tenants who have rental vouchers
- Housing with CHFA or USDA single family mortgages
- Housing with deed restrictions limiting the cost to low- and moderate-income tenants or owners
The Affordable Housing Appeals Act (§ 8-30g)
Why Not Count Unrestricted Lower Cost Housing?

There may be many homes in your town that are affordable for the households living there now. However, the State doesn’t count these as “Affordable” homes because there is no way to assure if or for how long the home will continue to be affordable when the home is sold or rented to a new household.

Counting housing with government subsidy or deed restriction:
• requires the housing meet a standard of quality as properties are inspected
• are publicly available
• have housing costs that are affordable to the occupant’s income
• certify income of the tenant
The Affordable Housing Appeals Act (§ 8-30g): Answering Common Misconceptions

- Towns are not required to have 10% of their housing units affordable. Ten percent sets the threshold for exemption from the statute.

- Affordable homes aren’t just new construction.

- Section 8-30g only applies to zoning regulations.

- What are some other facts we hear about Section 8-30g?
Incentive Housing Zone (IHZ): Municipalities can create Incentive Housing Zones (IHZs) with higher minimum densities with at least 20% of the units in the zone are affordable to residents earning 80% of the area median income or less. Municipalities can be eligible for incentive payments from the state for units that could be built in the designated IHZ. Incentive payments to the municipality are also available at the time that building permits are issued in the IHZ.

Accessory Apartments: Make it simple for homeowners to build an accessory dwelling. (Pomfret)

Density Bonuses: can allow developers to build more units than the standard zoning permits if they include a certain percentage of affordable or diverse housing units in their projects. This encourages the creation of mixed-income communities and promote housing diversity. (Ridgefield)

Reduced Parking Requirements: By lowering or eliminating parking requirements for developments near transit or areas with good walkability, zoning commissions can incentivize housing options that cater to residents who rely less on cars, thereby promoting diverse choices. (West Hartford)
