Re: Notification of Registration Requirement
Aquifer Registration DEADLINE DATE January 28, 2010
Requirements for Registration under Norwalk Aquifer Protection Area Regulations

Dear [Facility Name]:

Your business is located in the Aquifer Protection Area and subject to the requirements of the State of Connecticut Aquifer Protection Area Program and the City of Norwalk Aquifer Regulations. Businesses that conduct regulated activities are **required to register**. Your facility ([Facility Name]) at [Facility Address] is expected to register. **The deadline to submit a registration is at 4:30 pm on Thursday, January 28, 2010.**

To date, we have not received your registration application.

Several times over the past year the City has contacted you about the registration requirements of the new Aquifer Protection Area Regulations. This new state law requires that certain types of land uses currently conducted within Norwalk's Aquifer Protection Area must be registered with the City in order to continue to operate. Please find the attached list of regulated activities and the land uses typically associated with each regulated activity. Any facility or business within the Aquifer Protection Area that conducts a regulated activity ***must register***.

If any such facility or business *does not* register, it will be prohibited to conduct these activities in the Aquifer Protection Area, which means you will have to cease operations.

To assist you in meeting this upcoming deadline, we have updated our website (www.norwalkct.org) with all necessary forms, instructions, and information related to the Aquifer Protection Area Regulations.

Please feel free to call this office at 203-854-7744 with any questions you may have pertaining to your responsibilities under the Aquifer Protection Area Regulations or the registration process.

The City of Norwalk is committed to complying with the requirements of this law. Failure to register existing regulated uses will result in formal enforcement action. Your prompt submission of your registration application is greatly appreciated.

Sincerely,

Alexis Cherichetti
Senior Environmental Officer
